

# THE BLENDED LEARNING MODULES

[WWW.FORMACHAIN.EU](http://WWW.FORMACHAIN.EU)

## Modules

- Module 1: Child abuse
- Module 2: Collaborating in a chain

## Authors / developers

- Module 1: Sabrina Reggers
- Module 2: Remco de Jong
- Technical: Andy Veltjen

## MANUALS

The substantive / didactic and technical manuals relating to the blended learning modules can be found behind the other tabs in this folder. The digital versions of these can be found in the online training modules on [www.formachain.eu](http://www.formachain.eu).

## WHAT IS BLENDED LEARNING?

Blended learning encompasses all forms of learning supported by a combination of online and face-to-face means. It is an educational approach that combines the social aspect and the effectiveness of the classic campus learning with opportunities for student-centered and (inter)active learning in the online environment.

Creating blended learning modules goes beyond the mere addition of a piece of technology to replace the existing contact education. It involves the fundamental rethinking the method of teaching, by searching for the most appropriate combination of online and offline activities to support the various learning activities (Source: <https://associatie.kuleuven.be/schoolofeducation/projecten/Van%20elearning%20naar%20blended%20learning.pdf>, accessed on May 8, 2015).
